ECO-FRIENDLY CARTON SEALING TAPE

DESCRIPTION:

When you are making an honest crack at going green with your packaging, every little transition counts and adds up to a big difference. EcoEnclose offers several options in eco-friendly carton sealing tape. Whatever your needs and your budget, we have an earth-friendly solution for you!

Paper or plastic? Plastic tape remains the industry standard because it is the easiest to come by. In place of your ho-hum 'plastic' tape, we've married a cellophane backing with a natural rubber adhesive – thus crafting the perfect tape! Our Cello Carton Sealing Tape is uniquely and entirely plant-derived, renewable, and naturally biodegradable.

For high-volume applications you will discover our water-activated Kraft Paper Tape is better performing, more reliable, and more affordable per box seal. Most often, 1 strip of paper tape will do the job of 3 strips of plastic tape. The savings add up pretty quickly. Paper is our in-house preference.

For low-volume shipping, we recommend our Kraft Flatback Tape. The unique biodegradable blend of paper backing and pressure-sensitive natural rubber adhesive is easy to tear – no dispenser is necessary.
